Award Winner  **2009** **WORLD MOTORSPORT SYMPOSIUM**
www.world-motorsport-symposium.com

Millers Oils beat off strong competition from motorsport legends such as McLaren and Williams to scoop the prestigious 2009 'Most Innovative New Product' award at the World Motorsport Symposium with its revolutionary Nano Technology gear oil range; selected for its ability to radically improve transmission performance.

Continued investment in product innovation, spearheaded by our involvement in many areas of motorsport, has resulted in a range of high quality premium automotive products that our trade and retail customers can trust to provide exceptional reliability, performance and protection.

We supply retail, workshops and professional users world-wide with a comprehensive range of lubricants including the Premium and Trident brand names. Formulated to the highest industry standards – latest ACEA and API specifications – carrying official OEM approvals where appropriate manufactured to BS EN ISO 9001 : 2008.

“The service we receive from Millers Oils is top notch, as are the products. Millers Oils is one of the most trusted and respected automotive brands in the market and many of our customers prefer their products to any other brands due to the high performance specification.”

**PG Automotive,
Derbyshire**

As a choice supplier to independent workshops in the UK our products are available to the trade through many members of the trading group Group Auto Union (GAU) and a comprehensive number of leading UK Motor Factors.

For international customers, our export team will be happy to discuss your needs and put you in touch with one of our international distributors.

Whatever type of product you are looking for – engine oils, gear and transmission oils, brake fluids or fuel treatments – Millers Oils have the right products to meet all your vehicle servicing needs.

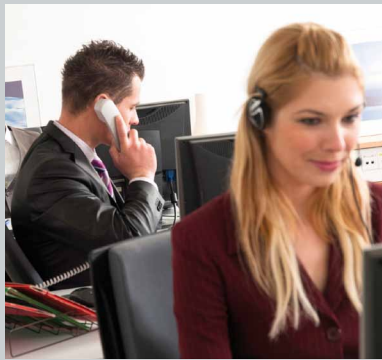

TECHNICAL SUPPORT

Millers Oils has a reputation among our customers for the quality and technical excellence of our products. But it's not a position we take for granted. We know none of this would be possible without the highest standards of customer service, technical knowledge and support.

TECHNICAL SUPPORT

All our automotive products are backed up by fast, accessible technical support. Our team of technical staff and engineers are always on hand to provide you with information and expert advice as and when it's needed.

Many of the technical details and specifications relating to our products and their use with particular vehicles and equipment are held in our own extensive database, so the answers you need may be available already.

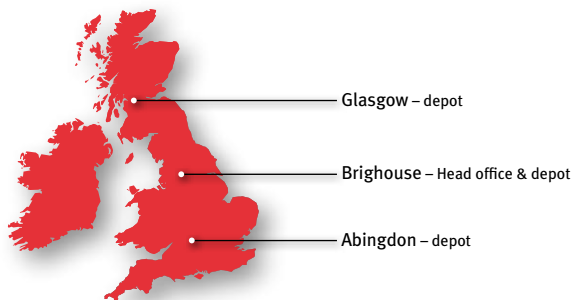

Where required, we provide support in the field, looking at the issues first-hand, even taking samples for laboratory analysis. In fact, Millers Oils is one of the few oil companies to have its own dedicated analysis labs. **So, because we don't outsource these services, you receive the results faster and you get to deal directly with the technical staff handling your query.**

GLOBAL SALES SUPPORT

UK customers benefit from direct contact with Millers Oils through our network of sales and business managers who cover the whole of the country. For international customers, our export team will be happy to discuss your needs and put you in touch with one of our international distributors.

We can offer the following support:

- Advice on which lubricant to use.
- OEM recommendations for vehicles and equipment.
- Recommendation on the correct use of our products.
- Lubrication problem solving.
- Product information.
- Material Safety Datasheet (MSDS) support.
- Sample analysis on lubricants.
- Help you understand the mysteries of lubrication.

“Millers Oils are excellent to work with, and we always look to show our customers the benefits of using Millers Oils products. We know it’s better value for money too.”

Motor Care Motor Factors,
Monmouthshire

WHICH OIL?

Lubricants are becoming more and more specific to particular engine types. With increasing pressure on the aftermarket to use the correct oil specification tailored to each engine – it has become increasingly difficult for workshop professionals to gather all the information required to make the correct product selection.

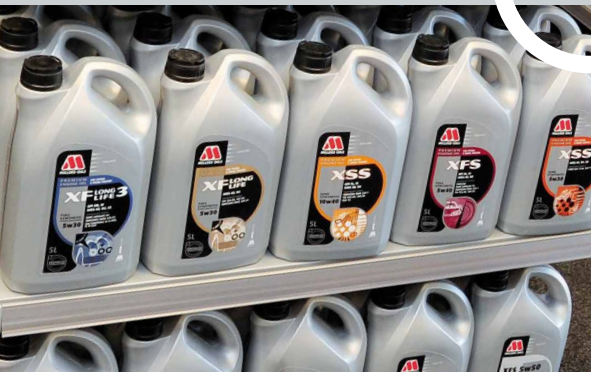

WHICH OIL?

We aim to make sure the aftermarket are aware of changes in engine requirements and therefore changes in engine oils. We are always on hand to offer expert advice on meeting these demands.

Millers Oils provide an extensive and comprehensive range of engine oils, gearbox oils (Manual & Automatic) and coolants designed to meet the specific requirements for both Cars and LCVs (Light Commercial Vehicles) – some of these products have earned the official approval of leading OEMs.

CAUTION: The use of incorrect engine oil can cause major engine damage!

www.millersoils.co.uk
WHICH OIL ADVISOR

APPLICATION GUIDE – ONLINE

All the detailed application information is now published on the Millers Oils website. The easy to use online “Which Oil” advisor which complements the application booklet can be found at www.millersoils.co.uk (click Which Oil Advisor). Identifying Millers Oils products has now become easier for the UK trade using MAM Autocat +

APPLICATION GUIDE – BOOKLET

Workshops now need to start thinking application and not just products. Our comprehensive ‘WHICH OIL’ application guide will help you select the right product specification for a given vehicle application. If you would like a copy of this booklet simply email: enquiries@millersoils.co.uk or ‘phone Millers Oils on +44 (0)1484 713201.

Which Oil? – Making the correct choice – Easy!

PREMIUM

ENGINE OILS | GEAR & TRANSMISSION OILS | FUEL TREATMENTS

For motorists who demand the best

Our flagship range of premium quality engine oils, transmission oils and fuel treatments, developed to maximise performance from today's advanced engines.

Featuring fully synthetic long life, fully synthetic and semi synthetic products, our Premium range has been proven to deliver improved performance, cleaner running, greater fuel efficiency and longer engine life. Which is why many of our brands have earned the official approval of leading manufacturers such as BMW, Mercedes-Benz and VW.

LONG LIFE, FULLY SYNTHETIC PETROL & DIESEL ENGINE OIL

Formulated to meet and exceed the most stringent emission requirements of car manufacturers, including **extended drain** capabilities, for engines operating under long life variable service regimes, carrying full manufacturer approval where appropriate.

Recommended for all modern cars, especially Euro IV or V compliant and those fitted with the latest emissions control equipment and diesel particulate filters (DPFs).

PREMIUM

ENGINE OILS | GEAR & TRANSMISSION OILS | FUEL TREATMENTS

For motorists who demand the best

FULLY SYNTHETIC PETROL & DIESEL ENGINE OIL

Millers Oils uses the very latest fully synthetic technology to produce a range of high performance engine oils suitable for today's high output engines. These fully synthetic oils offer significantly increased engine wear protection, while reducing friction, releasing more power for faster acceleration and increased MPG.

Added benefits include lower engine drag and reduced oil consumption.

Recommended for modern cars, especially high performance and turbo models.

SEMI SYNTHETIC PETROL & DIESEL ENGINE OIL

Semi synthetic engine oils offer a higher level of mechanical protection for your engine than conventional mineral oils, especially hydraulic valve lifters during cold starts, with the added benefits of lower engine drag and reduced oil consumption.

Diesel specific semi synthetics also offer enhanced turbo protection.

Trident

TRADE ENGINE OIL

Our Trident engine oils stand for quality and value.

All engine oils in the range surpass (OE) manufacturers' standards, so you can be confident of their suitability and performance.

Developed principally for professional and trade users. Suitable for high volume use in the workshop.

Please refer to the Millers Oils

WHICH OIL? Guide

See page 7 for details

- The range includes fully synthetic longlife, fully synthetic, semi synthetic and mineral grades.
- Developed using the latest technology to exceed the latest API and ACEA specifications.
- Trident engine oils are designed to cover servicing requirements from older vehicles to the latest high technology designs.
- The range provides a cost effective and affordable solution for the trade and workshop professional.
- The Trident range is suitable for both petrol and diesel engines.

Millers Oils specially designed stands for 25L packs. Sturdy welded steel construction.

For more details see page 15.

BULK OIL

Delivery available see pages 16-17
Dispensing equipment see pages 32-33

Suitable for the latest technology petrol and diesel engines. Highly recommended for use in newer vehicles using variable service intervals, requiring fuel efficient lubricants.

NEW

'OIL IN A BOX'

Introducing the new 15 litre **BAG IN BOX**. A 15 litre pack developed exclusively by Millers Oils for the automotive trade.

Filled with our premium range of professional workshop oils, the 15 litre **BAG IN BOX** is designed to be easy to stack, easy to handle and easy to pour. **BAG IN BOX** uses all the latest environmentally friendly packaging technology so it is much easier and cheaper to dispose of than conventional packaging.

Our new 15 litre BAG IN BOX provides a smart, practical solution for all oil changes and top-ups.

It's surprisingly cost effective too!

- **Convenient** 15 litre pack.
- Twin handles provide **improved usability**.
- **Compatible** with large bore tap (available separately) for **easy pouring**.
- **Easy stacking** and storage.
- **100% recyclable** box reduces waste disposal costs.

BETTER FOR THE ENVIRONMENT, REDUCED DISPOSAL COSTS

Recycling stages – It's as easy as 1...2...3...

FILLSTANDS

Millers Oils stands are designed to hold the new **15 litre BAG IN BOX** engine oil packs and/or our standard **25 litre plastic drums** for **safe, convenient** and **clean** pouring.

The stands are available in two types: a) our standard stand which will hold 3 x 25L, b) our new 'Lube Station' combination fill stand which will hold either 6 x 25L or 6 x 15L Bag in Box packs.

Both types of stand are made from high quality steel construction.

LUBESTATION

LUBESTATION

A 'ONE STOP SHOP' combination servicing stand designed to be used with the 15L Bag in Box packs (holds up to 90 Litres) or the standard 25 Litre drums (holds up to 150 litres).

The Lubestation has a convenient dispensing top shelf for storage of the highly regarded Millers Oils additives and fuel treatment products.

The stand is fitted with a handy oil drip tray and is supplied with wall mounting brackets for workshop safety.

With sloping shelves and tap space locators, the stand is perfectly designed to allow for easy decanting and pouring, essential where a variety of engine oil grades are being used.

The Lubestation allows workshops an opportunity to bring together servicing solutions in a simple, convenient and cost effective way. Being able to stock a full range of engine oils and additional servicing items such as engine flush and fuel treatments - the Lubestation is a highly attractive proposition for busy workshops with an eye on quality, efficiency and costs.

LUBESTATION capacity:

6 x 15L Bag in Box packs = up to 90 Litres

6 x 25 Litre drums = up to 150 Litres

STANDARD STAND capacity:

3 x 25 Litre drums = up to 75 Litres

BULK OIL PROGRAMME

Millers Oils Bulk Oil delivery programme allows busy workshops to buy popular Premium and Trident grades in bulk. Our bulk oil service is cost effective and reliable making it easy for busy workshops to concentrate on servicing cars.

- Direct workshop delivery
- Delivery within 7 working days for stock items
- Delivery for non stock items – (Please contact Millers Oils)
- Minimum order requirements apply

Support package

We offer our bulk delivery customers seat covers and floor mats to provide the complete service package.

Deliveries over 1000L will receive: 1 roll of seat covers and 1 roll of floor mats FREE.

NOTE: Seat covers & floor mats are also available to purchase from Millers Oils.

NOTE: The Millers Oils **Bulk Oil Programme** is presently operating in the United Kingdom only (excluding Ireland).

GEAR & TRANSMISSION OIL

Millers Oils range of Gear and Transmission Oils enable you to satisfy most of your servicing requirements for both Manual & Automatic gearboxes and transmission systems in cars, vans and trucks.

MANUAL GEAR OIL

A high performance semi synthetic gear oil for modern 5 and 6 speed manual gearboxes and final drives. Provides smoother gear changes and long-life mechanical protection.

An advanced, fully synthetic transmission oil for modern 5 and 6 speed manual gearboxes and rear axles, offering low friction and reduced drag. Providing increased performance, improved MPG, smoother gear changes and the highest level of mechanical protection.

Please refer to the Millers Oils

High quality mineral based extreme pressure (EP) gear oil treated with friction modifier for smooth operation of limited slip differentials.

Use in rear axles which incorporate limited slip and/or require special oils.

- Axles which incorporate friction plates to limit the amount of 'slip' between the two driven wheels often exhibit "stick-slip" resulting in unacceptable axle noise.
- The incorporation of special friction modifying additives ensures smooth power transmission and noise reduction.
- Can also be used in normal axles.

GEAR & TRANSMISSION OIL

Please refer to the Millers Oils

WHICH OIL? Guide

See page 7 for details

AUTOMATIC GEAR OIL

Automatic transmission fluids covering Dexron II and Dexron III requirements.

A premium synthetic based automatic transmission fluid exceeding the requirements of Dexron IIIH and Ford Mercon specifications.

- Easier gearshift performance even at low temperatures
- Shorter warm up leading to maximum gearbox efficiency
- Longer drain periods
- Stable friction properties increasing durability
- Stays in grade even under extreme working conditions
- Excellent high temperature oxidation stability up to 100,000 miles

MILLERMATIC ATF DM

GM DEXRON IIIH, FORD MERCON, MERCEDES-BENZ 236.1, 236.5 ZF TE ML 14A, ZF TE ML 09B

5386XJA	25L	5386BAA	BULK

Synthetic based automatic transmission fluid.

Primarily for use in Chrysler, Dodge, Jeep, Plymouth and Eagle vehicles requiring ATF +4.

Backwards compatible with all ATF + 3 applications.

- Improved gearshift performance.
- Offering superior wear protection and anti shudder properties.
- Outstanding low temperature fluidity.
- Excellent high temperature stability up to 100,000 miles under normal conditions.
- Extended transmission life.

MILLERMATIC ATF +4

MOPAR ATF + 3, ATF + 4

ENGINE TREATMENTS

A non-solvent based high detergent engine flush, which should be added to the engine oil before a drain and refill is to take place. Suitable for all car and light van petrol and diesel engines. Removes sludge and deposits from inside the engine.

Maintains the internal cleanliness of your engine, reduces wear, and increases engine life.

ENGINE FLUSH

ORDER CODES:

5777MAA **10 x 250ml** (Case)

A high quality product which can be added to engine or gearbox oil to help minimise leaks in cars, light vans in petrol and diesel engines, gearboxes and axles.

Helps maintain oil tightness in old or leaky seals.

STOP LEAK

ORDER CODES:

5619MCA **10 x 250ml** (Case)

RUNNING IN OIL

A high quality solvent refined SAE30 grade mineral engine oil, used to facilitate the running in of turbo charged and naturally aspirated engines.

- Note: Running-In oil should be changed after 500- 1000 miles.

RUNNING IN OIL

ORDER CODES:

6301GBA **5L x 4** (Case) 6301CAA **205L**
6301XIA **25L**

A high quality mineral based oil designed to restart arrested bedding of rebuilt engines.

- Saving both cost and time from having to rebuild the engine.
- Provides wear protection to the valve train and engine bearings whilst at the same time enabling the piston rings and cylinder bores to commence their correct running-in mode.

WARNING: This product must not be used in the engine for more than 200 miles.

GREASES

12.5kg pail

3kg tin

500g tub

400g cartridge

Millers Oils grease range covers a wide range of specialist and workshop applications for cars, vans and trucks. Grease cartridges make them easy to use and provide accurate application.

EQUIPMENT: We supply a wide range of equipment to help dispense, handle and apply our products – including manual and air grease guns – please see our listings on page 32 for more details.

A copper based lead free anti-seize compound.

Used for assembly work where ease of dismantling is required and to prevent metal to metal contact. Used also for threaded connection, track adjusters, rock drill extension rods etc.

- Easy to apply and long lasting.
- Mechanically and thermally stable.
- Broad temperature range non-melting.

MILLERGREASE NS

ORDER CODES:

- | | |
|---------|---------------------|
| 5259TAA | 6 x 500g tub (Case) |
| 5259SDA | 3kg tin |
| 5259QAA | 12.5kg pail |

A multipurpose lithium grease of outstanding performance with a distinctive red colour.

A universal, grease suitable for use on all antifriction and plain bearings. Also highly suitable for the lubrication of universal joints and electric motor bearings.

- Longer bearing life
- Good mechanical stability and tenacity.
- Extreme pressure (EP) properties providing excellent load carrying characteristics
- Excellent resistance to corrosion.

DELTAPLEX 2EP GREASE

ORDER CODES:

- | | |
|---------|----------------------------|
| 5305UCA | 36 x 400g cartridge (Case) |
| 5305TBA | 6 x 500g tub (Case) |

| 5305FIA | 20kg keg |
| 5305PBA | 50kg keg |
| 5305CDA | 180kg keg |

A specialised grease formulated with lithium soap and 20% molybdenum disulphide. Used on constant velocity joints and highly loaded sliding spline drive shafts. The high molybdenum disulphide content versus normal black greases provides a high load carrying capability making the product suitable for high load bearing applications.

- Very high molybdenum content versus normal black greases.
- Ideal for highly loaded constant velocity (CV) joints.
- Eliminates sliding spline binding under high acceleration loads.

HI MOL 20 GREASE

ORDER CODES:

5264TBA	6 x 500g tub (Case)
5264SDA	3kg tin
5264QAA	12.5kg pail

A lithium based grease containing molybdenum disulphide.

Used for applications throughout both industry and automotive sectors.

- Offers a high degree of corrosion protection.
- Excellent pumpability.
- Excellent extreme pressure and anti-wear performance.
- Good temperature tolerance.

BLACK MOLY MPQ 2

ORDER CODES:

5261UCA	36 x 400g cartridge (Case)
5261SDA	3kg tin
5261QAA	12.5kg pail
5261PBA	50kg keg
5261CDA	180kg

A water repellent Bentone based grease with additional solid extreme pressure (EP) additives.

Ideal for the lubrication of 5th wheel coupling on articulated commercial vehicles. Highly water resistant, very adhesive for extended service.

- The Molybdenum Disulphide 'solid' lubricant content provides extra load carrying capacity.
- Resists the emulsifying action of water.
- Excellent adhesive and cohesive properties.
- Highly resistant to removal by wiping, rubbing and squeezing action of mating surfaces.
- Excellent pumpability.

BLACK MOLY MILLERGREASE D180

ORDER CODES:

ANTIFREEZE

(Other antifreeze specifications are available, please request details)

SCREENWASH

A high quality, corrosion-inhibited, blue ethylene glycol automotive antifreeze which exceeds BS 6580:1992 standard. Typically provides 2 year protection under normal ambient temperatures.

- Offers protection from freezing down to -42°C at dilution rate to 50%.
- Excellent corrosion protection.
- Superior anti-foam properties.
- No silicates, nitrates, amines, borates or phosphates, leading to improved stability and freedom from scale and deposits.

ALPINE ANTIFREEZE BT Blue

BS 6580:1992 requirement

ORDER CODES:

5359GQA	5L x 4 (Case)	5359CIA	205L
5359DBA	60L (Export only)		

The ultimate screen wash for vehicle windscreens. Protects down to -44°C. Also aids the removal of dirt from vehicle windscreens. Dilution rates from 10% to 50%.

For use on vehicles, equipment and floors.

- Effective removal of road traffic film.
- Removal of heavy grease deposits.
- May be used to clean floors.

Can be used effectively with brush application.

SCREENWASH

ORDER CODES:

5645JTA	1L x 10 (Case)	5645KPA	25L
5645GQA	5L x 4 (Case)	5645CIA	205L

A monoethylene glycol based red automotive antifreeze and coolant, suitable for all year round use in the cooling systems of all internal diesel and petrol combustion engines.

- Offers protection from freezing down to -37°C at dilution rate to 50%.
- Extra long life – up to 150,000 miles or 5 years whichever occurs first.
- Excellent corrosion protection.
- No silicates, nitrates, amines, borates or phosphates, leading to improved stability and freedom from scale and deposits.

BRAKE FLUID

A high boiling point brake fluid for all braking systems where a non-mineral fluid is required. Meeting SAE J1703 / J1704 and FMVSS 116 Dot 4.

This product can also be used where older DOT 3 brake fluids are specified.

- Ideal for use in ABS systems
- Wet boiling point of 165°C.
- Enhancing performance against water absorption therefore improves resistance to vapour lock.

UNIVERSAL BRAKE FLUID DOT 4

SAE J 1703, FMVSS 116 DOT 4

ORDER CODES:

5391JVA	1L x 10 (Case)	5391FDA	20L
5391GTA	5L x 4 (Case)	5391XEA	25L
		5391CMA	205L

A high boiling point brake fluid exceeding the requirements of SAE J1703, SAE J1704 and FMVSS 116 DOT 4.

Used in racing and high performance braking systems.

- Enhanced capability to perform at high braking temperatures found under arduous racing conditions and high performance engines.
- Robust against water absorption, improving resistance to vapour lock.
- Wet Equilibrium Boiling Point above 194°C.

RACING BRAKE FLUID 300+

ORDER CODES:

MOTORCYCLE OIL

A range of high performance motorcycle oils formulated to cope with the high revving nature and higher operating temperatures experienced with motorcycle engines. Suitable for small-engined scooters to large V-twins, sports and race bikes, including those motorcycles running wet clutches. Both 4 stroke and 2 stroke oils are suitable for use on or off road and on the race track.

A very high performance fully synthetic 4-stroke motorcycle engine oil. Formulated with 100% synthetic base fluids and the very latest additive technology for maximum performance for 4-stroke motorcycles.

A high performance semi synthetic 4-stroke motorcycle engine oil. Contains a combination of the highest quality performance additives in both synthetic and mineral base stocks.

FUEL TREATMENTS

ECOMAX provides **more power** and **improved fuel efficiency**.

Using ECOMAX, drivers report 'better than new' engine performance – improved response and more miles per gallon. But that's not all. ECOMAX helps cars run cleaner, so it's better for the environment too.

FOR POWER FOR ECONOMY

FOR THE BEST OF BOTH WORLDS
THERE'S ONLY ONE CHOICE

ECOMAX

- **Improved fuel economy**
Up to 7% increased MPG.
- **Real power increases**
Improves throttle and engine response.
- **Cleans injectors**
Ensuring optimum performance.
- **Reduces emissions**
Proven reductions in soot, carbon and NOx.
- **Cost effective**
Low treatment rate (500ml).
- **Easy to use**
New patented UNI-POUR 500ml bottle.

International ECOMAX packs are available – please contact Millers Oils for more details.

500ml multi-dose pack

(DIESEL OR PETROL)

Each great value 500ml pack gives you enough to treat ten 50-litre tanks.

The low treatment rate makes this a very cost effective solution.

PETROL: Adds up to 2 Octane numbers.

DIESEL: Adds up to 4 Cetane numbers.

PETROL POWER ECOMAX

Motorsport

ENGINE OILS, TRANSMISSION OILS AND FUEL TREATMENTS

Millers Oils motorsport formulations are recommended by racing drivers, engine builders and engineers competing at many levels of motorsport and are also suitable for high output performance road cars. Using fully synthetic technology combining 3 synthetic esters and high performance additives, these state-of-the-art products will perform under the most extreme conditions, to boost performance, provide maximum protection and prolong component life.

Below is a small selection of products in our extensive Motorsport range. For details of other products in our range – please phone +44 (0) 1484 475050 or visit www.millersoils.co.uk

Especially suited to modified, high performance vehicles, with or without turbochargers, for fast road, race, rally and track day use. A performance alternative where the manufacturer specifies a 10w40.

Visit our website to read what motorsport competitors and enthusiasts have to say about our products including quotes from high profile BTCC teams and leading rally and racing drivers. Read also about how our 'Nano Technology' gear oils beat motorsport legends Williams and McLaren to a top Motorsport innovation award.

ENGINE OILS, TRANSMISSION OILS
AND FUEL TREATMENTS

Driving classics into the future.

Millers Oils is one of the few companies to offer an extensive range of engine oils, transmission oils and fuel treatments developed specifically for the owners of classic cars, motorcycles and commercials.

Below is a small selection of products in our extensive Classic range.

For details of other products in our range – please phone **+44 (0) 1484 475050** or visit **www.millersoils.co.uk**

This range and type of oil is suited to veteran and vintage cars manufactured before the early 1930s, and especially where engines do not have any form of oil filtration system.

CLASSIC MILLEROL M30 NON-DETERGENT MONOGRADE ENGINE OIL

ORDER CODES:

5065JCA	1L x 10 (Case)	5065DHA	60L (Export only)
5065GEA	5L x 4 (Case)	5065CGA	205L
5065XKA	25L		

This range and type of oil is suited to veteran and vintage vehicles where a mono grade oil is required and the engine has been reconditioned recently. Suitable for vehicles built during the period from the early 1930s to the early 1960s with superior oil filtration systems.

CLASSIC PISTONEEZE P30 LOW-DETERGENT MONOGRADE ENGINE OIL

ORDER CODES:

5754JCA	1L x 10 (Case)	5754XKA	25L
5754GEA	5L x 4 (Case)	5754DHA	60L (Export only)

Mineral engine oil for classic petrol and diesel engines.

CLASSIC 20w50 MINERAL MULTIGRADE ENGINE OIL

ORDER CODES:

CLEANING PRODUCTS

Millers Oils supplies several high performance cleaning and degreasing products for cars, vans and commercial vehicles. Each formulation is developed to deliver the best results for cleaning and degreasing applications.

A multi purpose phosphate free power cleaning fluid used on vehicles, equipment and floors for the removal of grease and film deposits.

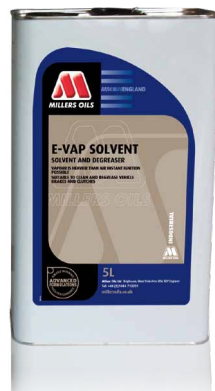

- Effective removal of road traffic film.
- Removal of heavy grease deposits.

Can be applied effectively by brush application.

		5486CKA	205L

E-Vap is a specially formulated blend of fast evaporating solvents, specifically designed to clean and degrease vehicle brakes and clutches.

- Provides the speedy and effective removal of dirt, grease, brake fluid and brake and clutch lining dust from all types of vehicle clutches brake drums, shoes, discs and calipers.
- Good grease spot removal from fabric.
- Good tar removal from carpets etc
- Also suitable for removing label & glue.

E-Vap is suitable for the degreasing of most types of metal parts in situ.

HAND CARE

Every year, thousands of mechanics suffer with skin problems after exposure to dirt, germs and chemical substances in their place of work, leading to lost working days each year – a loss to companies that can easily be prevented.

Following these 3 steps using X Clean Plus cleansing paste will help prevent the risk of debilitating skin disorders.

1. Always wash before and after breaks
2. Always use a natural hand cleanser
3. Always wash hands before and after using gloves.

Antiseptic non-alkaline solvent free cleansing paste, with polychips, Citrus smell, PH 6.5.

- Fully biodegradable.
- Cleans and protects skin
- Effective against a wide range of 'soils' including fats, oils, tars, grease and paints
- The presence of superfatting agents leads to skin protection
- Gentle to skin
- Helps prevent chafed and sore hands

GUARANTEE QUALITY

Millers Oils as a producer of Original Equipment (OE) specified products is obliged to produce products, in accordance with OE specification.

Millers Oils with the Association of the Constructors of European Automobiles (ACEA) through the participation in the European Engine Lubricant Quality Management System (EELQMS) implies a commitment to develop and manufacture those engine oils for which compliance with ACEA Oil sequences will be claimed, or to have such engine oils developed or blended by third parties, in accordance with the guidelines, described in the ATIEL code of practice as well as a commitment to ensure an independent audit of the development and manufacturing process. These commitments are made in a "Letter of Conformance" issued by the participating entity to ATIEL.

ATIEL confirms that it has registered the declaration of the Millers Oils entities' participation in EELQMS (oil marketer's) Letter of Conformance

Millers Oils Guarantee

Millers Oils' guarantee herein, applies amongst others, to workshops servicing all vehicles including those that are within their warranty period as provided and defined through regulation

Millers Oils hereby undertakes and guarantees:

- Millers Oils products will meet specifications as claimed or as agreed in writing
- Millers Oils products as claimed or as agreed in writing, will be compatible with engine, braking, gearbox or cooling systems in vehicles, as defined through regulation
- Millers Oils products as claimed or as agreed in writing, will be compatible with 3 way catalytic convertors or Diesel Particulate filters if fitted to a vehicle as defined through regulation

Conditions of the Guarantee

Millers Oils guarantee is thereby conditional upon the strict use of all products being used in accordance with:

- a) The recommendations as listed in the Millers Oils "Which Oil" application guide – 2009 edition, or official subsequent editions
- b) Millers Oils "Which Oil" application guide found at www.millersoils.co.uk
- c) Millers Oils Automotive Product Guide brochure – 2010 edition
- d) All other forms of official Millers Oils automotive product documentation and marketing literature
- e) MAM Software Autocat+
- f) Olyslager Database System: Lubricant Data for the Oil Industry

Although every care is taken to ensure the accuracy and completeness in compiling the data in accordance with the above, no liability, other than that which may be not excluded by law, can be accepted for damage or loss caused by any errors or omissions in the information listed.

How to claim under the Guarantee

1. In the event of the damage (but not later than 28 days from the date the damage occurred) please call Millers Oils Customer Services Manager on 01484 475084
2. At this point it will be important that you allow a Millers Oils technical representative to examine the vehicle and servicing records (if available) to determine the extent of the damage. Proof of both a) purchase and b) that the Millers Oils product was covered by the guarantee and was in use.
3. Allow a Millers Oils representative to obtain a relevant sample of the product for analysis to assist in determining the cause of the equipment failure. (Please note: No cost will be incurred by you)
4. Customer Services Department will register this complaint against the guarantee and will produce a full report, with the outcome and will be sent back to you in due course.

This Guarantee excludes:

- Millers Oils products that have been wrongly used especially in accordance with equipment mechanically deficient or faulty or through abnormal operation, negligence, abuse, damage from an accident or equipment modification outside of the OEM original specification
- Millers Oils products that have been used in conjunction with any other un-authorized products for use with Millers Oils products – for example Fuel treatments
- Any damage to or the costs or expenses of recalling, repairing, replacing, altering, removing or making any refund in respect of any product caused by or arising from :-
 - a) any defect in or the harmful nature of or unsuitability for its intended purpose of such product supplied
 - b) an error or fault in connection with the sale, supply or presentation of such product supplied
- Repair or replacement of equipment due to normal wear and tear
- Any claim that is not proved, supported or verified by a mutually appointed assessor/engineer that damage to an engine, braking, gearbox or coolant system has been caused by reasons of the Millers Oils products not meeting the specification claimed or agreed.

Quality Management System:

Millers Oils has a company been assessed and registered by NQA against the provisions of BS EN ISO 9001 : 2008

Applicable to the design, blending, stocking, distribution and supply of lubricants, greases and allied products, maintaining a quality management system to the above standard, which will be monitored by NQA.

PREMIUM

For motorists who demand the best

Our flagship range of premium grade engine oils, transmission oils and fuel treatments, developed to maximise performance from today's advanced engines. Featuring semi synthetic, fully synthetic and long life products, our Premium range has been proven to deliver improved performance, cleaner running, greater fuel efficiency and longer engine life. Which is why many of our brands have earned the official approval of leading manufacturers such as BMW, Mercedes-Benz and VW.

Trident

Value without compromise

Our Trident branded engine oils stand for quality and value you can trust. Developed principally for professional and trade users, the Trident range offers a consistently high standard of quality, suitable for high volume use in the workshop and covering all servicing requirements from older and higher mileage vehicles to the latest high technology designs. Trident products surpass manufacturers standards, so you can always be sure of their suitability and performance.

Motorsport

The spirit of competition

The racetrack and rally stages provide the ultimate proving ground for high performance products – and it's here that Millers Oils has built a strong reputation. From club drivers to teams in the British Touring Car Championship and British Rally Championship we've earned our place on the grid. We're working with drivers and engine builders, developing technically advanced products to boost performance, provide maximum protection and prolong component life. Innovation, for us, is a race without a finish line.

Driving classics into the future

Millers Oils is one of the few companies to offer a range of engine oils, transmission oils and fuel treatments developed specifically for the owners of classic cars, motorcycles and commercials. Our Classic products benefit from the latest advances in lubrication technology to create oils that not only meet older viscosity requirements but also provide maximum protection and actively prolong the life and performance of treasured vehicles.

"Ultimate Protection in Period Viscosities"
